

As a ham radio operator I strongly oppose this petition.
I am a law abiding citizen who should not be required to "register" with anyone to buy a product that is perfectly legal to purchase and use. This is an unreasonable burden on store owners with no hope of improving the situation with unauthorized use of the airwaves.

This is the same kind of misguided thinking that has made it nearly impossible for citizens in some areas to exercise their right to keep and bare arms, a right guaranteed in the 2nd amendment. How long till this measure turns from not just leaving a name and address, but a waiting period to purchase? Has it help reduce crime anywhere these measures have been used on gun owners? No, in fact the reverse is true if you look at the records honestly. Neither will this measure prevent unauthorized use of amateur frequencies.

Please reject proposal RM-10641.
